

Jessy Riordan

Front-End Engineer

I started my career as an educator. As education became increasingly more technology focused I became more interested in technology rather than education. When the opportunity presented itself for a career switch I enrolled in The Iron Yard, a 12-week intensive bootcamp, for Front End Engineering. I am currently looking for a Junior Front End Developer position to utilize the skills I have acquired and continue to learn and acquire new skills. I am willing to relocate for the right position.

Front End Engineering from The Iron Yard
May 2015 - July 2013

Bachelor of Arts from Virginia Wesleyan College
Psychology, August 2003 - May 2007

703.819.3007
